Algae and... **Evolution**

Did you know that Algae...

- live almost everywhere on Earth
- are among the most ancient living organisms
- gave rise to all the plants you see and eat (even flowers!)

Algae and... **Biodiversity**

Did you know that Algae...

- build coral reefs and kelp forests
- are food for fish and even some whales
- are every color of the rainbow

Algae and... **People**

Did you know that Algae...

- produce half the oxygen in the air you breathe
- are used to make medicines, toothpaste and ice cream
- can become fuel for cars
